

?

) What exactly is GDPR compliance?

The General Data Protection Regulation (GDPR) is a set of regulations created by the European Union (EU) to protect the PII (personally identifiable information) of individuals within the EU.

PII includes any information which, directly or indirectly, could identify a living person, such as name, phone number, and address etc.

Why do you need to be GDPR compliant?

Ensures organizations are transparent about how they process and store personal data.

Gives individuals more control over how their personal data is collected and processed.

	/
$(\setminus$	

Shows that you **value the privacy** of your users and take the utmost care to protect their rights and personal information.

ľ		
L.		

Violators of GDPR may be fined up to €20 million, or up to 4% of its annual worldwide turnover of the preceding financial year, whichever is greater.

Who must undergo a GDPR audit?

Applies to any entity that collects or processes PII of EU residents, regardless of their location.

How do you get GDPR compliant?

GDPR preparation

Define a process to manage

data subject rights
